**SACOA
WETTA 1000
BIO-DEGRADABLE SURFACTANT**

ACTIVE CONSTITUENT: 1003g/L NON-IONIC ETHOXYLATES

FOR USE AS A BIO-DEGRADABLE WETTING AND SPREADING AGENT. A SPRAY ACTIVATOR FOR USE WITH KNOCKDOWN AND RESIDUAL HERBICIDES

DIRECTIONS FOR USE:

SITUATION	APPLICATION RATES	CRITICAL COMMENTS ☐ ☐
General weed killing sprays High volume power spray Low volume power spray Misting machines Knapsack	10mL/100L 40mL/100L 5mL/15L 2mL/15L	
High volume power spray Boom Spray Knapsack	120mL/100L 120mL/100L 20mL/15L	For maximum efficiency, this higher rate of SACOA WETTA 1000 must be used to ensure even and thorough coverage of plant foliage and to increase absorption. This is particularly important for killing grasses and full, dense vegetation.
Soil Residual Herbicides. e.g.: diuron	100-400mL/100L	When applying soil active herbicides such as diuron to standing weeds, add SACOA WETTA 1000 to thoroughly wet foliage. Consult product labels for individual recommendations.
Watering of turf and dust abatement. As additive to water	40-100mL/100L	Use the higher rate when watering turf.

HERBICIDE SPRAYS: SACOA WETTA 1000 can be added to all herbicide sprays to increase their efficiency except those which are known to contain adequate wetting agent in the formulations. Wetter should be added only where directed on individual labels, as use with selective herbicides outside label directions may reduce crop selectivity. For foliar active herbicides spray to the point where the leaves and stems are just wet. Spraying beyond this will encourage runoff, with obviously loss of spray chemicals. When spraying waxy or hairy leaved plants, which are typically hard to wet, increased activity will be obtained by increasing the rate of SACOA WETTA 1000.

It is important that the leaves and stems are thoroughly wet for foliar herbicides to work efficiently, particularly when treating dense, tall vegetation.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT: Toxic to fish - although rapidly biodegradable, contamination of streams, rivers or waterways with the product or used containers should be avoided.

STORAGE AND DISPOSAL: Store in the closed original container in a cool, well ventilated area. Do not store for prolonged periods in direct sunlight. Triple or (preferably) pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush, puncture or bury empty containers in a local authority landfill. If not available, bury the container below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 13 11 26.

SAFETY DIRECTIONS: Avoid contact with eyes and skin. When preparing product for use wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow length PVC gloves, face shield or goggles.

NOTE: SACOA Pty Ltd accepts no responsibility for any consequences whatsoever arising from the use of the product otherwise than in accordance with this label.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS: SACOA WETTA 1000 is a bio-degradable spray additive containing 100% non-ionic surfactant and is suitable for use with all types of herbicides. It increases herbicide activity by better wetting and absorption and improved spray coverage. SACOA WETTA 1000 can be used with both acid and alkaline sprays and mixes easily with all types of water.

MIXING INSTRUCTIONS: SACOA WETTA 1000 mixes quickly and easily with water and should be added directly to the spray tank. It should not be added direct to undiluted sprays containing wetting agent.
